SUMMARY

I'm a full stack developer specializing in MERN stack, React Native, and blockchain technology. With expertise in React.js, Next.js, and Solidity, I've built complex websites, including e commerce platforms and social media sites. I excel in developing clean, maintainable code and integrating APIs. I'm passionate about creating Web3 applications with enhanced security and decentralization. I'm skilled in Next.js for delivering excellent user experiences and optimizing websites for search engines. Let's collaborate to bring your ideas to life.

EXPERIENCE

web developer
soft echo September 2020 - August 2022, online
· Analyzed project workflows and processes, identifying bottlenecks or inefficiencies.
· Implemented process improvements, resulting in an average 25% reduction in project delivery time and increased team productivity.
· Leveraged Next.js, a server-side rendering (SSR) framework, to improve website performance and enhance search engine optimization (SEO).
· Implemented SEO best practices, resulting in an average 75% improvement in website visibility and organic search performance.
· Implemented tracking and analytics tools (e.g., Google Analytics) to monitor website performance and user behavior.
· Analyzed website data and metrics, providing insights and recommendations for further optimization, resulting in an average 30% increase in website conversion rates.

web developer
freelance August 2017 - July 2020, online
· Created interactive user interfaces (UIs) using React.js, crafting reusable and modular components.
· Implemented responsive designs, ensuring optimal user experiences across various devices and screen sizes.
· Developed server-side applications using Express.js, building robust APIs and handling data requests efficiently.
· Integrated server-side rendering (SSR) with Next.js, optimizing performance and enhancing SEO capabilities.
· Kept up-to-date with the latest web development trends, frameworks, and best practices.
· Engaged in self-directed learning to expand knowledge and expertise in web development technologies.

administrator of IT department
Latakian court-ministry of justice September 2015 - May 2017, Latakia
· Implemented proactive monitoring and maintenance strategies, resulting in a significant decrease in system downtime.
· Achieved an average system uptime of over 99%, ensuring uninterrupted access to IT services for court staff.
· Spearheaded the ambitious initiative to digitize court documents dating back to 1950, ensuring long-term preservation and easy accessibility of crucial records.
· Oversaw the transition from physical paper-based archives to a comprehensive digital document management system.
· Digitized and indexed hundreds of thousands of court documents, including case files, and legal records, spanning a period of 70 years.
· Ensured the accurate and efficient conversion of physical documents into digital formats, enabling quick retrieval and search capabilities.

----

projects
Discord-clone https://discord-clone-gamma-seven.vercel.app/
a real-time messaging platform with voice and text communication, server-based communities, and multimedia sharing, inspired by the features and functionality of Discord.

Airbnb clone https://next13-fullstack-airbnb.vercel.app/
a peer-to-peer accommodation marketplace platform that enables users to book and list properties for short-term rentals, inspired by the concept and features of Airbnb.

E-commerce https://next-full-ecommerce-fkss.vercel.app/
an online retail platform that facilitates the buying and selling of products, providing a user-friendly interface, secure payment processing, and seamless shopping experience, similar to established e-commerce websites.
