SUMMARY

As a MERN full-stack and mobile cross-platform developer with expertise in Next.js and React Native, I have a proven track record of building complex websites, including e-commerce platforms, social media sites, and blogs, as well as experience in real-time video applications and deployment to production environments. With a strong skill set in integrating APIs and services, developing RESTful APIs, and writing clean, maintainable, and modular code, I adhere to industry standards and stay up-to-date with the latest technologies and frameworks. My passion for innovation and collaboration means that I can deliver solutions that meet clients' unique needs, whether it's an e-commerce platform, social media site, blog, instant messaging app, or any other complex web project. Let's work together to bring your ideas to life.

Projects

- fully functional full stack blog website, we can fully control our posts, register users and log in and out. CODE DEMO
- fully functional next13 full-stack Airbnb clone with crud operations of adding properties and users CODE DEMO
